

JOHN MARK CAJES

markcajes24@gmail.com | Bohol, Philippines | github.com/CajesJM

PROFESSIONAL SUMMARY

Information Technology student with hands-on experience leading software projects and developing client-facing web applications. Proficient in React and TypeScript, with a strong focus on creating solutions that enhance user workflows and support real-world systems.

WORK EXPERIENCE

Wipe It Good Trading

2025 - 2026

Product Photo Editor / Web System Developer

- Enhanced product images, improving visual appeal and clarity across online listings and sales materials.
- Developed a client-facing online ordering system, streamlining order management and enhancing customer experience.
- Maintained consistent branding by organizing image assets and implementing detailed quality checks.
- Collaborated with a client to understand business needs and iteratively improve system functionality and user interface.
- Applied problem-solving skills to address challenges in web system development and photo editing.

PROJECTS

TMC Connect

2025

Lead Developer / Full-Stack Developer

- Developed a cross-platform web and mobile campus event system for Trinidad Municipal College with role-based access for Super Admin, Admin, and Student users.
- Built QR code check-in and GPS-based attendance verification to support faster event check-ins and reduce proxy attendance.
- Implemented event registration, real-time attendance analytics, secure Firebase authentication, and offline persistence for unreliable campus WiFi.

OJT Logbook Attendance

2026

Developer

- Built a responsive logbook application for students starting on-the-job training, facilitating attendance tracking and progress documentation.
- Implemented offline IndexedDB storage for uninterrupted functionality, even without internet access.
- Included PDF and DOCX export features, simplifying the submission and review processes for students.

Wipe It Good Trading Online Ordering Platform

2026

Sole Developer / Full-Stack Developer

- Developed a full-stack e-commerce system for a client, including a customer storefront and admin dashboard for managing products, orders, inventory, and customer records.
- Built a React, TypeScript, Node.js, Express, PostgreSQL, and Prisma-based platform with REST APIs, role-based access, shopping cart, order tracking, and order status history.
- Implemented authentication, email verification, password recovery, customer/admin notifications, Philippine address selection, map/geocoding support, and payment-ready checkout workflows.

EDUCATION

Trinidad Municipal College

Bachelor of Science in Information Technology

Bohol, Philippines
